

Blue Star Highway “Rainbow Bridge”

Streetlights

- **Shield them** — light the road, not the night sky
- **Lower brightness** — appropriate wattage

Handrail Lighting

- **Programmable LEDs** — shielded underneath
- **Rainbow colors** — change for special occasions
- **Dim automatically** — late at night, motion turns them back on

Vision

- Businesses and residences install lights and follow the color scheme.
- A beautiful nighttime space draws visitors and inspires community.
- The night sky is darker and we see more stars.
